#### **Autonics**

# **ANALOG TIMER**

Thank you very much for selecting Autonics products. For your safety, please read the following before using.

## Caution for your safety

\*Please keep these instructions and review them before using this unit.

\*Please observe the cautions that follow;

**Warning** Serious injury may result if instructions are not followed.

⚠ Caution Product may be damaged, or injury may result if instructions

\*The following is an explanation of the symbols used in the operation manual. ▲ caution:Injury or danger may occur under special conditions.

#### **∧** Warning

1. In case of using this unit with machineries(Nuclear power control, medical equipment, vehicle, train, airplane, combustion apparatus. entertainment or safety device etc), it requires installing fail-safe device, or contact us for information required.

It may result in serious damage, fire or human injury

- 2. This unit must be mounted on panel.
- It may give an electric shock 3. Do not connect terminals when it is power on.
- It may give an electric shock.

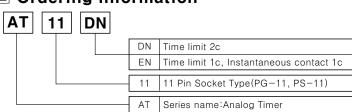

4. Do not disassemble and modify this unit, when it requires. If needs, please contact us.

It may give an electric shock and cause a fire

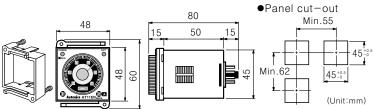

#### **⚠** Caution

- 1. This equipment shall not be used outdoors.
- It might shorten the life cycle of the product or give an electric shock.
- 2. Please observe specification rating.
- It might shorten the life cycle of the product and cause a fire.
- 3. In cleaning the unit, do not use water or an organic solvents. It might cause an electric shock or fire that will result in damage to the
- 4. Do not use this unit at place where there are flammable or explosive gas, humidity, direct ray of the sun, radiant heat, vibration, impact
- 5. Do not inflow dust or wire dregs into inside of this unit. It may cause a fire or mechanical trouble

#### Ordering information

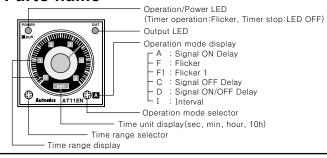

#### Dimension

\*The above specification are changeable without notice anytime.

#### Parts name

#### Time specifications

| Time range | Time unit | Time setting range |
|------------|-----------|--------------------|
| 0.5        | sec       | 0.05 to 0.5        |
| 1.0        |           | 0.1 to 1.0         |
| 5          |           | 0.5 to 5           |
| 10         |           | 1 to 10            |
| 0.5        | min       | 0.05 to 0.5        |
| 1.0        |           | 0.1 to 1.0         |
| 5          |           | 0.5 to 5           |
| 10         |           | 1 to 10            |
| 0.5        | hour      | 0.05 to 0.5        |
| 1.0        |           | 0.1 to 1.0         |
| 5          |           | 0.5 to 5           |
| 10         |           | 1 to 10            |
| 0.5        | 10h       | 0.05 to 0.5        |
| 1.0        |           | 0.1 to 1.0         |
| 5          |           | 0.5 to 5           |
| 10         |           | 1 to 10            |

#### Specifications

|  |   | AT11DN   | AT11EN  |        |

Signal

Delay

While the terminals @ and @ snort-circuited(INHIBIT signal input is ON) during the time progressing, the time progressing will be stopped. The time progressing is continued when the terminals @ and @ are open-circuited(INHIBIT signal input is OFF).
 Please set the min. setting time for 100ms or more at F and F1 output mode operation. When the min. setting time is less than 100ms, it might not be operation normally due to relay contact reaction time.

# Input signal condition

1. Relay contact input

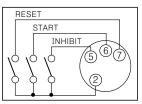

Please use gold-plated switches with good contact assurance and short bounding time for contact input.

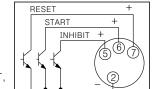

2. NPN open collector transistor input: The characteristic of transistor shall be Vceo: Min. 25V

Ic: Min. 10mA

Icbo: Max. 0.2μA. Residual voltage: Max. 0.5V

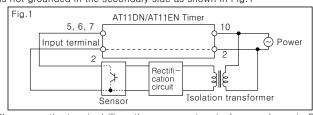

3. Please maintain 50ms for signal width of relay contact and solid state input(START, RESET, INHIBIT)

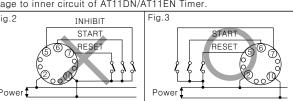

## Caution for using

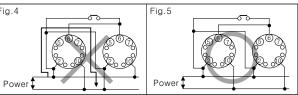

1. AT11DN/AT11EN are designed as power circuit without using a transformer. Therefore the power of sensor is supplied by isolation transformer which is not grounded in the secondary side as shown in Fig.1

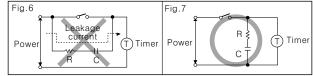

2. Please use the terminal ② as the common terminal as as shown in Fig.3. If use the terminal @ as common terminal as shown in Fig.2, it might cause damage to inner circuit of AT11DN/AT11EN Timer.

3. When one input signal is inputted to plural timers, be sure to avoid the wiring as shown in Fig.4. Otherwise, the short-circuit current will flow to cause breakage.

- 4. Please connect DC power input after checking polarity of power
- 5. When apply the power, please apply rating power at the moment by switch, relay etc. Otherwise it might cause malfunction.
- 6. Do not use this product for long time. It may cause shorten life cycle of Timer due to heat inner electric component.
- 7. When supply the power to the timer, connection as shown in Fig.6 might cause malfunction due to leakage current though R and C. Please connect R and C as shown in Fig.7 to prevent malfunction as shown in Fig.7.

- 8. Do not wire START, RESET, INHIBIT signal input line with power line, high voltage line in parallel.
- 9. It might cause malfunction if change the setting time, time range or operation mode during unit operating. Please change the setting time, time range or operation mode after cut the power off
- 10. When test dielectric voltage and insulation resistance of the control panel with this unit installed.
- ①Please isolate this unit from the circuit of control panel.
- ②Please make all terminals of this unit short-circuited.
- 11. Do not use this unit at below places.
- ①Place where there are severe vibration or impact.
- @Place where strong alkalis or acids are used.
- 3 Place where there are direct ray of the sun
- Place where strong magnetic field or electric noise are generated. 12. Installation environment
- 1 It shall be used indoor ②Altitude Max. 2000m
- 3 Pollution Degree 2
- (4) Installation Category II
- \*It may cause malfunction if above instructions are not followed.
